## Improved Builders' Master Keyed Locks.

Nos. 610, 611, 665, 666, 669, 670.

M. W. & Co. have succeeded in producing a Lock, for which there has long been a demand, which can be made in sets of any quantity, from six to one hundred and forty.

The Lock is on an entirely new principle, and made very safe. The Master or Pass Key is not a skeleton, but is as safe as the regular key.

These Locks have been produced at a large outlay for dies, patterns, etc. and we feel quite sure they will meet with favor.

ANY OF OUR MORTISE LOCKS AND LATCHES THAT ARE MADE WITH BRASS FRONTS AND BOLTS, FURNISHED WITH PLAIN SOLID GOLD BRONZE FRONT AND STRIKER IF REQUIRED.

### Log Measures.

Explanation of Log Sticks:—These Sticks give the number of feet of one inch square edge boards sawed from a log from 12 to 36 inches in diameter. The figures 12 to 20, near the head, are for the length of logs in feet; follow the column under the length of the log to the diameter of the log, which will give the number of feet the log will make. Logs not over 15 feet long, the diameter should be taken at the small end; over 15 feet in length, at the middle.

The adjusting of the Fence to this Plow will be found a great improvement over the old style of Plow. It is simple in its construction, easily and accurately adjusted; as all projections are on the left hand side, the mechanic is not obliged to remove his tools from the work-bench in order to use it.

This attachment is applicable to all Screw Arm Tools.

## Four Wheel Sewing Machine Casters.

The above cut represents the parts put together, but not clamped to the legs of the Sewing Machine.

One of the new necessities of the age following the general introduction of Sewing Machines into the households of the civilized world, is the

## SEWING MACHINE CASTER,

already very extensively sold by the Sewing Machine Agents, which we now offer to the Hardware Trade as a

## Regular Article in the Hardware Line.

We are owners of the patents both in the United States and Europe, and keep in stock Casters for all the well-known styles of Machines, as follows:

## Sewing Machine Casters—Continued.

The above cut represents a set of the Casters in use on a "Singer" Stand, the lever A having been pressed down (with the foot) thereby raising the Machine from the floor and throwing the whole weight upon the Caster Wheels, so that the Machine can be rolled freely in any direction.

As the clamping parts are different for different makes of Machines it is necessary, in ordering, to state for what make the Casters are wanted.

## List Price.

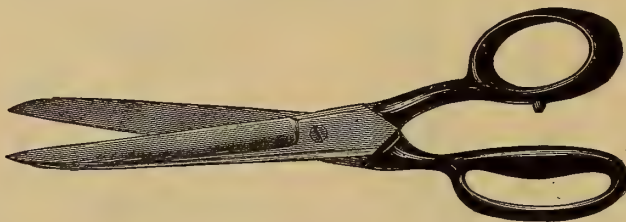

Four Wheel Casters, . . . . . per set, \$5 00

The first order for 1 dozen sets will entitle the customer to a model of Sewing Machine Stand with Casters attached and in working order, *free of charge*.

The discount allowed affords a large margin for the employment, by the trade, of local visiting Agents to sell the Casters at houses. Circulars giving particulars sent upon application.
